RMIT University — Master of Data Science

Entity: RMIT University

Snapshot date: 2026-09-27

Source URL: https://www.rmit.edu.au/study-with-us/levels-of-study/postgraduate-study/masters-by-coursework/mc267

Important: This file is a project source snapshot prepared from the official source listed above. It is not an official publication of the university or Australian Government. It is intended for the team's local RAG knowledge-base experiments and should be refreshed before final deployment.

Course identity

- Course: Master of Data Science
- Program code: MC267
- CRICOS: 093313B
- Campus: Melbourne City
- Mode: on campus

Duration and intake

- International students can study full-time.
- Standard duration: 2 years full-time.
- Advanced standing can reduce the full-time duration to 1.5 years for eligible prior study.
- Published next intakes: February and July.

2027 international fee

- Indicative international tuition: AUD 47,040 per year.
- RMIT describes the figure as an indicative annual fee based on a standard full-time study load.
- Fees are adjusted annually, so the dataset records the fee year explicitly.

Entry requirements

- Relevant Australian bachelor's degree or international equivalent in computer science, data science, artificial intelligence, software engineering, information technology or statistics with GPA at least 2.0/4.0.
- An alternative consideration pathway may apply to a bachelor's degree plus at least three years of relevant professional experience.
- English requirement includes IELTS Academic 6.5 overall with no band below 6.0, or an approved equivalent.
