Australian Catholic University — Bachelor of Computer Science/Master of Data Science

Entity: Australian Catholic University

Snapshot date: 2026-10-13

Source URL: https://www.acu.edu.au/handbook/handbook-2026/course/bachelor-of-computer-sciencemaster-of-data-science-acu-online

Important: Project-created research snapshot based on the linked official ACU 2026 handbook. This is not an official university publication. Verify all information on the official source before advising students or deployment.

Course identity

- Course: Bachelor of Computer Science/Master of Data Science
- Course code: BCompSc/MDataSc
- Course delivery/location: ACU Online only, according to the 2026 handbook.
- Minimum duration: 4 years full-time or equivalent part-time.
- Structure: 320 credit points, comprising 240 credit points for the Bachelor of Computer Science and 80 credit points for the Master of Data Science.

Data science content

- The data science component includes data wrangling and machine learning fundamentals, statistical data modelling, predictive analytics, data science project work, data analytics and visualisation, deep learning, and data mining.
- The handbook lists ACU Online as the approved location. Do not describe this course as delivered on ACU's Melbourne campus; ACU is a Melbourne-based institution but this course is online-only in the cited handbook.
- International fees, CRICOS eligibility and onshore student visa eligibility are not confirmed by this handbook snapshot; verify these separately before including this course in international-student comparisons.
